Currently a Flutter Intern, aiming to enhance programming skills and develop programming thinking to become a professional Fullstack Developer with ReactJS and VueJS in the future.

TECHNICAL SKILLS

Languages

JavaScript (ES6+), Dart, HTML5, CSS3, C/C++

Frameworks & Platforms

Flutter, ReactJS, Android, VueJS (learning), NodeJS (basic)

Databases

MySQL, Firebase, MongoDB, PHP

Tools

PROFESSIONAL SUMMARY

I am Tran Duc Manh - a Flutter developer with internship and fresher experience at Wesmart. I graduated in Information Technology from the University of Economics - Technical Industries Hanoi. I have a passion for mobile application development and aim to become a Fullstack Developer in the future. I also have experience in IoT hardware projects, including AI camera systems, network configuration, and server setup for high-rise building projects.

WORK EXPERIENCE

Flutter Developer (Intern/Fresher)

Wesmart, Hanoi

January 2024 – June 2025

- Developed and maintained mobile applications using Flutter framework
- Designed responsive UI components from Figma specifications
- Implemented state management patterns (Bloc, Provider)
- Integrated Firebase services and deployed applications to production
- Conducted testing and debugging processes before product delivery
- Installed camera equipment for PVP high-rise buildings
- Set up network infrastructure for smart building solutions
- Configured servers for data storage and processing
- Conducted testing and quality assurance for hardware systems

KEY PROJECTS

Store + Blogger Management Application

Flutter + Firebase

- **Description:** Music instrument store management application (guitars, pianos) combined with personal blog for self-introduction and product showcasing
- **Features:** Product management, order processing, personal blog, revenue analytics dashboard
- **Technologies:** Flutter Web, Firebase Authentication, Cloud Firestore
- **Link:** github.com/TranManh1904/shop_instrucment_flutter

Git, Postman, Figma, VS Code

Hardware & IoT

Camera AI systems, Network configuration, Server setup, Smart devices

EDUCATION

Information Technology Engineer

University of Economics - Technical Industries (UNETI), Hanoi

2021 – 2025

Major: Computer Engineering
GPA: 7/10

LANGUAGES

Vietnamese: Native

English: B1 Level - Can use in work environment

Music Streaming Application

Flutter

- **Description:** Online music streaming application with ZingMP3-like interface
- **Features:** Online music playback, playlist creation, song search, music library management
- **Technologies:** Flutter, Audio Service, API integration
- **Link:** github.com/TranManh1904/music_app

Shoe E-commerce Website

ReactJS + NodeJS

- **Description:** E-commerce website for shoes and footwear
- **Features:** Product display, shopping cart, payment processing, user management
- **Technologies:** ReactJS, Node.js, Express, MongoDB
- **Link:** github.com/TranManh1904/react_shop_shoe

ADDITIONAL EXPERIENCE

High School Math Tutor (Part-time during university)

Provided mathematics tutoring for students in grades 10-12, developed strong communication and teaching skills while helping students achieve academic success. This experience enhanced my ability to explain complex concepts clearly and work effectively with diverse individuals.
